To purchase, call Beth at (202) 642-0806 phone, or email beth@dcstudentsctf.org

A Tiny Home with a Big History

This building project was completed by skilled trades career and technical education (CTE) students enrolled in the industry-accredited Academy of Construction and Design in Washington, DC.

High school students completed the project under the guidance and mentoring of certified craft instructors and professional builders. Proceeds from the sale of the student-built tiny house will be reinvested in the Academy's skilled trades education and training programs for local youth.

Academy students took great pride in their work on this project, and we hope the owner of this new home will enjoy their efforts for many years to come.
